

REFRIGERA 2025

PRESS RELEASE No. 3/2024

REFRIGERA 2025

The refrigeration trade show is expanding with increasing international participation

Cormano, 2 September 2024 – REFRIGERA 2025 continues its rapid growth. The international event - the only one in Italy and today a reference point for Southern Europe - of the **entire industrial, commercial and logistics refrigeration supply chain**, will be held at **Bologna Exhibition Centre**, from 12 to 14 November 2025.

REFRIGERA 2025 is breaking all past records. The square metres booked in the pavilions of BolognaFiere are increasing every month as the event approaches: after the recent success of rebookings during the past few weeks, **REFRIGERA 2025** will offer visitors the opportunity to meet leading companies in the Italian sector, as well as an expanded pool of national exhibitors. **Big names in international refrigeration have already said yes to REFRIGERA 2025 and will be joining us at BolognaFiere.**

Several innovations are in store for the fourth edition of the event. One of these is the **FREEZING TECH** area, dedicated to **technology for the production of frozen foods**: technology, systems, machinery, accessories and everything related to pre-treatment, processing, packaging and storage of frozen foods. **APPLITECH**, the exhibition dedicated to **components and equipment for appliances**, will take place at the same time as **REFRIGERA**, in collaboration with Senaf Srl.

Expected visitors include cold chain specialists as well as professionals in **the production and distribution of the food, pharmaceutical, transport and logistics industries, technicians and designers from the food retail and large-scale retail trade sectors and many others.**

Become a key player of the main event dedicated to refrigeration: grab the opportunity now to book your stand. **REFRIGERA 2025** is an event organised by A151 srl in collaboration with respected national and international associations in the sector; **Assofrigoristi, Asercom, ATF - Associazione Tecnici del Freddo, Centro Studi Galileo** and **OITAf**.
