

PRESS RELEASE

Great success for Refrigera and Applitech 2025

Next appointment: November 2027 at BolognaFiere

Bologna, 7 November 2025 – **Refrigera 2025**, the international exhibition dedicated to industrial, commercial, logistics, frozen and cryogenic refrigeration, and **Applitech 2025**, the only trade show in Europe exclusively focused on the home appliances and consumer electronics industries and supply chains, closed today at **BolognaFiere** with record-breaking numbers.

More than **320 exhibitors** from **25 countries**, including Belgium, China, France, Germany, the Netherlands, Poland, the Czech Republic, the United Kingdom, Spain, Switzerland, Thailand, and Turkey, took part in the two events. The total **exhibition area exceeded 10,000 gross square metres**, marking a **12% increase** compared to the previous edition.

Both exhibitions represent vital sectors with a strong international footprint. According to **Mordor Intelligence**, the **refrigeration industry** reached a global value of **USD 25.35 billion in 2025** and is expected to surpass **USD 32 billion by 2030**, with an **average annual growth rate of around 5%**.

At **Refrigera 2025**, discussions focused on the CO₂, propane, and ammonia supply chains. **Antonio Rossetti** from the **CNR (National Research Council of Italy)** presented the **Enough project**, focused on natural refrigerants for transport.

“The goal of the project is to provide tools and methods that contribute to achieving climate neutrality,” said Rossetti. “The idea is to develop demonstrators of sustainable technologies using natural fluids.”

Francesco Mastropasqua from **Epta** added: “Energy costs are increasingly high, and climate change is a reality. We must use CO₂ for refrigeration and focus on thermodynamics, innovative insulating materials, electronics, and integrated plug-in and integral unit solutions. The new frontiers of sustainability involve more careful material selection and management, a focus on efficiency, emission reduction, and end-of-life management.”
